TSSA Plan

2025 - 2026

Goal

Our targeted TSI goal is to keep raising scores for our students with disabilities. This year we did not go up like we did the year before so we will continue to work to increase those scores.

Coaching Piece

We will use our coach to work with teachers. We will use our Literacy Coach to help coach our teachers through strategies that will help all our students grow, but specifically our students with disabilities and ML students. She will look at best practices for teachers and help teachers with ideas on how to improve scores.

Professional Development

Coaching will help increase teacher capacity, which will in turn create growth in literacy. Coach will help teachers identify best practices.

Professional development in Language Arts (Wit and Wisdom) and new math will help increase teacher skills to help them teach students better. We intend to give more professional development in Mastery Connect so teachers can utilize their data for interventions and collaboration for students.

School-Based Initiative

TSSA is designed to support most of the components of a School Based Initiative. Increase teacher knowledge, skills and opportunities.

Professional learning – money was set aside to pay for substitutes so teachers can work on school goals in power standards and learning scales as well as coaching plans and endorsements.

Technology – extra money can be used for technology for teachers and students. Before or after school programs. We pay teachers to advise groups.
